Summary

I'm Jianjun Xiao, a Ph.D. candidate in Internet Education at the Beijing Normal University Research Center of Distance Education, under the supervision of Professor Li Chen. My research interests include Online Learning Environments, Learning Analytics, and AI in Education, with a focus on integrating education and technology.

Since 2019, I have been responsible for the design and development of the cMOOC platform, leading the functional design and iteration based on WordPress and the WeChat ecosystem. In the fields of Learning Analytics and AI in Education, I have led and participated in multiple research and open-source projects, published several high-quality academic papers, and developed a solid research background in the educational applications of complex network modelling, NLP, and explainable AI. I have frequently participated in academic presentations and have been invited to serve as a member of the editorial board or a reviewer for several international academic journals.

Projects (❂ = Recipient)

❂ Research on Automatic Assessment and Improvement Path of cMOOC Learners' Interaction Level Based on Dual Networks — **2023 - 2024**
Project of Interdisciplinary Research Foundation for Doctoral Candidates of Beijing Normal University (Grant No. BNUXKJC2305).

Research on Educational Reform and Innovative Management in the Era of "Internet Plus" — **2019 - 2023**
Key Project of the Department of Management of the National Natural Science Foundation of China (Grant No. 71834002).

Social-Behavioural-Cognitive-Emotional Based Analysis and Intervention Study of Online Collaborative Role Interaction — **2022 - 2025**
National Natural Science Foundation of China (NSFC) 2022 Young Science Fund Project (Grant No. 62207003).
