Selected Awards (❂ = Team Leader)

Second-class Award for Academic Innovation for Postgraduate Students
2025, 2026
Beijing Normal University, Beijing, China

First Prize in AI-Powered Online Teaching Innovation Competition
2025
China Association for Educational Technology

❂ Bronze Awards & Feishu Special Awards in The 2nd Global Digital Intelligence Education Innovation Competition
2025
Digital Intelligence International Development Education Alliance, Beijing, China

❂ Second-class competition scholarship
2024
Beijing Normal University, Beijing, China

❂ Second Class Innovation and Entrepreneurship Scholarship
2017
Linyi University, Shandong, China

Experience

iFLYTEK CO.LTD.
Student of iFLYTEK Spark Training Camp
Aug. 2023

Beijing Normal University Research Center of Distance Education
Research Assistant and R&D Engineer
Jan. 2019 - Aug. 2020

Education

Beijing Normal University
PhD in Internet Education
Sept. 2023 - Present

Beijing Normal University
Master's in Educational Technology
Sept. 2020 - Jun. 2023

Linyi University
Bachelor's in Educational Technology
Sept. 2014 - Jun. 2018

Summary

I'm Jianjun Xiao, a Ph.D. candidate in Internet Education at the Beijing Normal University Research Center of Distance Education, under the supervision of Professor Li Chen. My research interests include Online Learning Environments, Learning Analytics, and AI in Education, with a focus on integrating education and technology.

Since 2019, I have been responsible for the design and development of the cMOOC platform, leading the functional design and iteration based on WordPress and the WeChat ecosystem. In the fields of Learning Analytics and AI in Education, I have led and participated in multiple research and open-source projects, published several high-quality academic papers, and developed a solid research background in the educational applications of complex network modelling, NLP, and explainable AI.

Projects (❂ = Recipient)

❂ Research on Automatic Assessment and Improvement Path of cMOOC Learners' Interaction Level Based on Dual Networks 2023 - 2024

Research on Educational Reform and Innovative Management in the Era of "Internet Plus" 2019 - 2023

Social-Behavioural-Cognitive-Emotional Based Analysis and Intervention Study of Online Collaborative Role Interaction 2022 - 2025

Doctoral Dissertation

A Study on Intelligent Representation and Intergroup Comparison of Co-experience in cMOOCs Based on Community of Inquiry 2026
Define the essence of co-experience in cMOOCs and construct a coding model based on CoI. Utilize artificial intelligence technology to develop automated co-experience recognition methods, converting them into analyzable serialized data representations. Employ systems science methodologies to propose quantitative indicators for co-experience, enabling process-oriented, automated experience evaluation.
